

Fire Protection Engineer / Sprinkler Designer – Long Island, NY

A prominent, well established and growing fire sprinkler company based in Long Island, New York is currently looking for an engineer/fire sprinkler designer with a minimum of 2 to 5 years' experience in the fire sprinkler contracting industry. The qualified candidate will have knowledge in the fire sprinkler installation industry and will possess the ability to design and work on daily ongoing projects and complete them in a timely manner. We will entertain engineering graduates and train them in the fire sprinkler industry.

Qualifications and responsibilities include:

- Have working knowledge of all types of fire sprinkler systems
- Understand and familiar with NFPA 13, NFPA 14, NFPA 20 and NYC codes
- Use programs such as AutoCAD, Sprinkcad and Hydraulic Calculations
- Monitor installation process, close out documents
- Must be detail oriented
- Coordination with other trades
- Material Listing / Cut sheets
- Field Surveying
- Excellent computer skills

We are looking for individuals who are motivated and can work independently, welcome challenges and wants to be a part of our growing team. We are willing to train the right person with experience in the piping and/or drafting fields.

The company offers competitive salary commensurate with experience, union affiliation, health and dental benefits.

Interested candidates should forward resumes to Carol Remondino at carol@af-fire.com.
