

## **GRADUATE ENGINEER (FIRE SAFETY)**

- Exposure to international clients & project teams
- Positions available across New Zealand and Australia

### **About Olsson Fire & Risk**

Olsson Fire & Risk has key offices across Australia, New Zealand and the United Kingdom and we work with many of the industries largest private sector and government clients. As a leading Australasian fire engineering and risk management consultancy, Olsson Fire & Risk offers global insight and over 250 years of collective expertise in fire safety, risk engineering and fire protection. We operate in Melbourne, Sydney, Perth, Brisbane, Auckland, Christchurch and Wellington, London, Manchester, Edinburgh and Glasgow.

We are looking to strengthen our capabilities and teams by adding Graduate Fire Engineering roles in our Auckland New Zealand office.

We are looking for Graduates with a Masters in Fire Engineering, or equivalent degree, who are ready to start their exciting careers in 2016. We also offer study assistance and support to those still studing or who want to take their education even further, while working part time.

### **Job Description**

Reporting to the Business Manager, Fire Safety Engineering, you will join an experienced team to deliver detailed fire safety consulting services along with regular opportunities to support project delivery from our other offices and countries. Our global graduate development program has set a high benchmark and forged a successful path for others to follow. We have hired and developed graduates from leading Engineering Universities around the world including; Australia, New Zealand, Europe and North America. You will be joining a team that fosters knowledge, innovation and collaboraton.

As you develop your skills and knowledge, you will learn to:

- Develop conceptual and detailed Fire Engineering strategies to meet client and community benchmarks
- Competently conduct Fire, Smoke, and Egress Modelling
- Coordinate and intergrate fire strategies within a design
- Communication and negotiation skills with Authorities and Stakeholder

### **The Successful Applicant**

You will be a highly self-motivated person with tertiary engineering qualification, having just completed your Masters in Fire Engineering or be ready to graduate soon. You will be a high achiever with exceptional academic results that reflect your dedication and commitment to learning. Work experience either full time or part time in a customer services/team orientated occupation will be well regarded. You will demonstrate an extremely strong work ethic, commitment to deliver first class client outcomes and a passion to learn and work in a team orientated structure.

We will also support visa applications and relocation costs.

To apply online please click 'Apply' and submit your resume, cover letter and academic transcript.
