**Job Summary:**

**About the Agency**  
Make a Career Connection! We are looking for individuals who would like to come to work for a small, independent regulatory agency dedicated to saving lives. We work very hard to protect the public from the unreasonable risk of injury and death from consumer products. Every U. S. Consumer Product Safety Commission (CPSC) employee is proud to be a part of a team that works together to assure that the products you use every day are safe. Consider a position at the CPSC as your career choice.

Join the team! This position is located in the Division of Combustion and Fire Sciences (ESFS), Directorate for Engineering Sciences. ESFS provides the focus for the agency of combustion and fire hazards in consumer products. The division provides professional expertise in combustion appliance engineering, fire protection engineering, fire science, textile science, product emissions, and related codes and standards. ESFS staff works on a variety of short and long term projects associated with reducing product hazards that are highly topical and relevant, with the opportunity to effect changes to the fire safety and combustion engineering of a variety of consumer products.

**RELOCATION AUTHORIZED**  
- No

**KEY REQUIREMENTS**  
- U.S Citizenship Required.
- Background Investigation Required.

**DUTIES:**  
As a General Engineer or Fire Prevention Engineer, the incumbent will conduct and interpret engineering analyses in the area of fire and combustion safety of consumer products, including combustion appliances. They will develop written engineering analyses of products in the division’s purview within a specified time period. The incumbent will support the engineering work of the division through tasks such as internet searches, database searches, and scientific literature searches as requested. Prepare contract statements of work; provide technical advice in the establishment of the overall Commission fire science and combustion engineering program and all evaluations associated with fire sciences, fire safety, and combustion appliance product hazards. This position will require administrative tasks in support of the Directorate, which may include, but are not limited to, managing contracts and purchase card requests.

**Qualifications Required:**  
Applicants must have 52 weeks of specialized experience equivalent to at least the next lowest grade level in the Federal service (time-in-grade). Specialized experience is experience that has equipped the candidate with the particular knowledge, skills, and abilities to perform successfully the duties of the position.

Applicants must meet the qualifications for this position within thirty (30) days of the closing date of this announcement.

**Examples of qualifying specialized experience include:**  
GS-07: 1) Experience making measurements and recording data and observations using appropriate equipment and protocols; 2) performing routine engineering tests and evaluations; and 3) applying basic knowledge of engineering principles and theories in the area of fire protection and combustion engineering to assist in the determination of whether a consumer product presents a hazard.
GS-09: 1) Experience performing routine engineering tests and evaluations and developing reports based on findings; 2) designing and implementing engineering studies; and 3) applying knowledge of engineering principles, theories, and research in the area of fire protection and combustion engineering to assist in the determination whether a consumer product is a hazard.

The specialized experience must be fully described in the duties section of your resume in order to receive credit.

**Mandatory Education Requirement:** All Applicants must meet one of the following requirements to qualify for consideration for an engineering position:

- Successful completion of a professional engineering degree at an accredited university or college. **OR**
- You must have a combination of college-level education or training, AND technical experience that has furnished you with (1) a thorough knowledge of the physical and mathematical sciences underlying professional engineering, and (2) a good understanding, both theoretical and practical, of the engineering sciences and techniques and their applications to one of the branches of engineering.
