We are Capitol Fire Sprinkler, a third generation fire sprinkler company that has been in business for over 60 years in New York City. Our Company employs many of the most experienced fire sprinkler experts in the business, and we are thrilled and eager to train the new class of Fire Protection Project Engineers.

The Company is led by Richard ('74) and Adam Levine ('06), both Fire Protection Engineers from the University of Maryland. Feel free to check us at www.capitolfire.com, or on Facebook.

DUTIES

- Design fire sprinkler systems
- Prepare hydraulic calculations
- Participate in Company learning / training sessions
- Coordinate sprinkler design with existing structure and other subcontractors via 2D/BIM .
- Prepare "as-built" drawings for in-house archive and client files.
- Review project updates for change orders.
- Prepare stock lists and material requisitions.
- Perform field surveys for initial drawing layout as well as follow-up for accuracy and coordination.
- Interface with GC / Owner

QUALIFICATIONS

- Bachelor's degree in Engineering
- Must be knowledgeable and experienced at applying National Fire Protection Association (NFPA) standards
