The 1st University of Maryland NFA Fire & Life Safety Ecosystem Symposium

Presented by the Department of Fire Protection Engineering

This exciting new symposium will be the first of its kind to bring together a multi-disciplinary group of participants to learn about the NFA Fire & Life Safety Ecosystem and explore its application to address contemporary fire safety challenges.

Who should attend: researchers, academics, risk managers, code officials, engineers, architects, fire service, public policy decision makers, urban planners.

Why attend: interact with leading professionals to appreciate the benefits of applying the NFA Fire & Life Safety Ecosystem and understand the multi-disciplinary nature of providing an effective fire safety program in a building or community.
