

UNDERWRITERS LABORATORIES FELLOWSHIP

A graduate research fellowship has been established within the University of Maryland Department of Fire Protection Engineering (FPE). The fellowship activity will involve research of interest to the UL Fire Safety Research Institute (FSRI), much of it being done off-campus. The FSRI office is located in Columbia, Maryland and some of the activity could involve travel (supported by UL).

A FPE advisor will monitor the performance of the selected fellow to confirm that the fellow remains in good academic standing and is making satisfactory progress in their research endeavor. The fellow will also need to report to a supervisor at FSRI. The FPE advisor will consult periodically with the supervisor at FSRI to confirm the satisfactory performance of the fellow.

The policies for students to remain in good standing will be in accordance with that outlined in the Graduate School Catalog, <http://apps.gradschool.umd.edu/Catalog/policy.php?assistantship-policies>. The level of effort contemplated for the fellow will be 20 hours per week during the fall and spring semester, and 40 hours per week during the period between in the summer between the fall and spring semesters.

Should the performance be deemed unsatisfactory, the fellow will be advised of such in writing with a follow-up meeting and be given an opportunity for improvement. Should performance not improve, the fellowship will be terminated with 30 calendar days' notice (as per the policies of the Graduate School).

Anyone interested in being considered for this fellowship should complete the attached and submit to Dr. Jim Milke (milke@umd.edu) by March 1.
