Fire Protection Engineering Manager

Overview

ACS Professional Staffing is looking for a Fire Protection Engineering Manager to work for our client out of their Seattle, Washington office. The ideal candidate is a tenured and licensed Fire Protection Engineer with experience in Commercial MEP facility project management.

Here are a few more incentives:

- Employer Paid Employee Health, Dental, Vision and Life insurance
- 4 weeks of PTO + Holidays
- 401K Match
- Transit Pass and Education Benefits

Responsibilities:

- Perform building and fire code analysis and code interpretations
- Design new fire protection systems including suppression systems, fire detection, alarm and communication systems
- Perform analysis of existing fire protection systems
- Prepare layouts and provide input for design proposals and drawings
- Incorporate design concepts from schematic design into design development
- Proactively pursue continued education, training, certifications and opportunities to network within the industry
- Stay updated on code changes, industry trends and technical tools that can be utilized
- Review, stamp and sign design documents
- Lead project coordination meetings with clients and internal project teams
- Coordinate as necessary across a variety of building design disciplines, including mechanical, electrical, architectural and structural
- Ensure that work is completed on time and within budget
- Coordinate as appropriate with governmental authorities to anticipate and resolve regulatory and zoning challenges
- Provide timely communication and correspondence with the client and serve as the client’s primary point of contact
- Meet regularly with existing clients to discuss current projects, evaluate firm performance and identify other business opportunities with them or through referrals
- Meet targets for marketing activities, business development, client retention and managed project volume
- Identify staff and organizational development needs and conduct staff training
- Provide technical support to other staff in areas of expertise as a trainer and mentor
- Serve as a role model for subordinate staff

Requirements:

- Fire Protection Engineer (FPE) License is required
- Bachelor’s degree in a related discipline, equivalent technical school training, or equivalent work experience
- Relevant professional or technical background with generally 15 or more years of experience in a professional engineering environment
- Proficiency with AutoCAD, Revit MEP, and other specialty-critical software preferred
• Proficiency with Microsoft Office including Word, Excel, and Outlook
• Strong verbal and written organizational and communication skills
• Experience in account management and maintaining long-term client relationships
• Demonstrated ability to design and administer multiple projects of varying size and scope simultaneously through all design and construction phases

Work sponsorship not available at this time. No third-party candidates considered for this position.

ACS Professional Staffing will provide equal employment opportunities to all applicants without regard to applicant’s race, color, religion, sex, gender, genetic information, national origin, age, veteran status, disability status, or any other status protected by federal or state law. The company will provide reasonable accommodations to allow an applicant to participate in the hiring process if so requested.
