

**FIRE AND EGRESS MODELING
PROJECT MANAGER AND DIRECTOR POSITIONS
Los Angeles – St. Louis – New York City**

Company Background

Code Consultants, Inc. (CCI) is a privately held and internationally recognized fire protection engineering and life safety consulting firm. We are seeking an experienced professional to join our fire and egress modeling team.

Founded in 1973, CCI is an industry leader, providing a diverse range of essential fire protection and life safety consultation and design services including but not limited to:

- fire and life safety consulting
- fire and egress modeling
- hazardous materials analysis
- fire sprinkler design
- fire alarm design
- mass notification design

CCI's experienced and trained team of over 90 professionals consists of fire protection engineers, architects, civil/mechanical/electrical engineers, and former code officials and members of the fire service. At CCI we value being experts, responsive to our client's needs, developing solutions, and our team members. We continuously strive to provide a great culture, and career and personal development opportunities.

As a privately held firm, CCI's partnership and leadership team is fully responsible for the strategic direction of the firm and growth is successfully managed by maintaining a stable organizational structure, consistent professional service products across our offices, and robust business development initiatives.

Role

As a member of the CCI team your responsibilities will include:

- Taking a prime role in leading the fire and egress modeling group, including mentoring, training, project management, and quality control.
- Applying creativity to develop alternate method concepts using fire and egress modeling.
- Ensuring CCI is using the most up to date and appropriate fire and egress modeling tools and resources.
- Collaborating with CCI team members and clients, and interfacing with Building/Fire Officials.
- Participating in business development initiatives to promote and expand CCI services.

Qualifications

Ideal candidates possess the following:

- A degree in fire protection engineering or related engineering discipline.
- 5 to 10 years of fire and egress modeling experience, specifically with the following software packages: Fire Dynamics Simulator, Pathfinder, and CONTAM
- Knowledge of Building/Fire/NFPA Codes and Standards related to fire protection and life safety.
- Excellent written and verbal communications skills.
- Motivation to pursue growth opportunities for themselves and CCI.
- Sufficient experience to lead the day to day operations of the fire and egress modeling department.
- FE or PE licensure is desirable, but not required.
- Passion for the CCI values and providing the highest level of services to CCI clients.

Compensation

CCI offers an excellent compensation package with an objective performance-based bonus program and benefits (including 401(k) with matching contributions, health, dental, vision, life and disability plans).

Contact

Interested and qualified candidates please send resumes to CCI's Human Resources Department at HR@CodeConsultants.com.
