Idaho Falls, Idaho Falls, ID, US

9 days ago
Requisition ID: 1556

Position Purpose:
The primary purpose of a Fire Protection Engineer (FPE) is to provide advanced fire protection support to an assigned Site Area. Develop solutions to a wide range of complex fire protection issues, which require ingenuity, innovation, and creativity. Duties include development and management of fire hazards analysis (FHA), fire safety assessments (FSAs), engineering design files (EDFs), and facility design reviews as directed by management. Other fire protection duties include review of work control documentation and walk downs to ensure safe and timely completion of inspection, testing, and maintenance of fire protection systems and equipment. Additional fire protection responsibilities including implementation and management of the company’s fire protection programs including, but not limited to, management of fire protection impairments; control of cutting, welding, and other hot work activities; control of combustible loading; and control of flammable and combustible liquids.

Minimum Qualification Requirements (Education/Experience):
Registered Professional Engineer (PE) in Fire Protection

OR

Bachelor Degree in accredited engineering discipline plus 4 years of engineering experience, with at least 3 of these years being in responsible charge of diverse fire protection engineering work

Candidates shall be knowledgeable in fire protection regulations/standards that apply at a DOE contract facility subject to 10 CFR 851 requirements.

Familiarity with National Fire Protection Association (NFPA) and
International Building Code (IBC) for evaluating fire protection issues required.

Minimum of 3 years professional level, fire protection field experience required. Additional years of experience (a plus)

Fire protection PE (a plus)

Graduate degree in Fire Protection (a plus)

Fire protection experience at DOE sites (a plus)
