CAREERS

FIRE PROTECTION ENGINEERING INTERNSHIP

Irving, TX

Reference No: 14783

What's the role?

We're looking to provide customer-focused Fire Protection interns with the opportunity to gain a tremendous amount of knowledge regarding the company, our products and how our engineering operations drive the growth of Hilti's business through the completion of value-added projects and day-to-day tasks.

Who is Hilti?

If you're new to the industry, you might not have heard of us. We provide leading-edge tools, technologies, software and services for the global construction sector. We have a proud heritage, built over 75 years, and a worldwide reputation for pioneering products and exceptional service. With some 27,000 people in more than 120 countries, which we're looking to expand, we're a great place for you to show us your worth, step up to new challenges and grow your career.

What does the role involve?

Our ten-week summer internship is a great opportunity to bring talent into the organization and expose our interns to Hilti as a future employer. Interns typically work full time during the summer on value-added projects that are relevant to their education and that drive Hilti's business. Individuals who successfully complete an internship will be considered for a full-time position upon graduation.

At Hilti, we live our four core values of teamwork, integrity, courage and commitment. Every Hilti team member contributes to our mission to passionately create enthusiastic customers and build a better future. We are always looking for like-minded talent to join our team!

Examples of past projects:

Create/enhance engineering judgement process

Webinar presentation to 50 Hilti field personnel to train them on new technical data

Support continuing education process for external fire protection engineers by planning for summer lab education event

This is the cutting edge of corporate innovation, where the pace is fast, fun, energetic and inspiring.

What do we offer?

We'll give you everything you need to excel in your role, including ongoing training and lots of responsibility from the start. In return for your exceptional performance and consistent results, you'll receive one-to-one career mentoring, as well as exciting opportunities to move around the business.

Why should you apply?

We have an excellent mix of people, which we believe makes for a more vibrant, more innovative, more productive team.

What you need is:

- Are in pursuit of a Bachelor's Degree in Fire Protection Engineering or Technology
- Graduate in Fall 2020 or Spring 2021
- Desire to pursue the business aspect of the engineering profession
- Successfully completed concrete and steel classes (preferred)
- Can identify, analyze, and solve technical problems
- Are results oriented and proactive - able to get things done and achieve targets
- Possess strong communication and presentation skills
- Have a GPA of 3.0 or above
- Are willing to relocate nationally
- Are eligible to work in the US permanently without sponsorship

Hilti, Inc is committed to employing a diverse workforce. Qualified applicants will receive consideration without regard to race, color, religion, sex, national origin, age, sexual orientation, gender identity, gender expression, veteran status, or disability.

Hilti – Working in Engineering (English)

“I love the fact that my job isn’t just technical. It involves planning and dealing with people too. The culture is brilliant. It’s challenging, yes, but it’s friendly and welcoming too. It’s all about teamwork, and your ideas are really taken on board.”

- Andreas, Head of Corporate Research and Technology
