Fire Protection Designer - Spring 2021 Graduate - (SOU0001GA)

Description

At Jacobs, we're not just building structures, we're helping our clients innovate and grow by designing, engineering, and executing the construction of their state-of-the-art facilities that are changing our world. We're transforming intangible ideas into innovative solutions designing the future - today.

As an Fire Protection Designer working with our Built Environments team in the DFW area, you'll use your skills and experience to help deliver and complete challenging and engaging buildings projects. You'll assist in the design of Water Spray/Sprinkler systems, Fire & Gas Detection systems, and Fire Alarm systems while also helping develop the plans for the overall building safety.

You'll be a part of diverse multi-discipline teams allowing you to both share what you know and learn so you can grow. Bring your creativity, ambitious spirit and extreme attention to detail, and we'll help you pursue and fulfill what drives you – so we can deliver extraordinary solutions for a better tomorrow, together.

Start date beginning of Summer 2021.

Qualifications

Here's What You'll Need:
- An ABET accredited Bachelor's Degree in Fire Protection, Fire Protection Engineering Technology, Mechanical, Electrical or other engineering discipline
- Good interpersonal skills
- Good verbal and written communication skills

Ideally, you’ll also have:
- Experience in design engineering experience in "suppression, alarm, and detection systems" primarily for industrial process manufacturing and facilities Prior work or internship experience
- Engineer In Training (EIT) certificate
