Mechanical Engineer Intern - Fire Protection

Job Code: 2020-PCO-030

Location: Georgia-Peachtree Corners

Job Type: Fire Protection

Job Responsibilities:

We are currently in need of a Mechanical/Fire Protection Engineering Intern / Co-op to join our Fire Protection design team located in our office Peachtree Corners for the Summer/Fall semesters. We have a number of exciting projects in house serving clients in the municipal, military and corporate segments. Our fire protection engineers work alongside architecture, electrical, mechanical, structural, and CAD teams providing building systems design to our program managers delivering comprehensive design consulting and project management services. With some clients we go further in providing design/build solutions utilizing our in-house construction management team.

Job Qualifications:

Mechanical Engineering or Fire Protection Engineering major. Good academic standing required. Experience in CAD and REVIT preferred.
