

## Position Available at RAN Fire Protection Engineering

**Job Title:** Fire Protection Engineer

**Job Description:**

- Manage ongoing projects
- Coordinate with clients and other disciplines
- Design fire protection systems

A Fire Protection Engineer will manage projects and work directly with clients across all our markets; providing the opportunity to gain experience with all types of buildings and fire protection systems. A Fire Protection Engineer should anticipate travel through the New England area 10-15% of the time. Occasionally, there will be opportunities to travel around the country and international travel with along with work on international project.

Fire Protection Engineers at RAN design fire protection systems. RAN does not typically utilize performance specifications, instead we require our engineers to know how a system is installed, verify the installation requirements, and develop the acceptance criteria. This opportunity allows engineers to take pride in their education and knowledge of fire protection systems.

**Qualifications:**

- 3-5 years of experience designing fire protection systems
- B.S. or M.S in fire protection engineering
- Work with AutoCAD or Revit.

**About RAN Fire Protection Engineering:**

Our firm has vast experience working with a wide variety of clients on advanced technological, institutional, commercial, high-rise, manufacturing, education, government, residential, and industrial projects. We provide various services for these markets including code consulting, fire protection engineering and design, due diligence investigation, evaluation services, commissioning, litigation support, master planning, and performance-based designs. These services require a deep-rooted knowledge of various types of building systems and the way in which they perform integrated functions. To properly service all our projects, engineers use their knowledge and skills to design systems such as sprinkler, fire alarm, high expansion foam, and specialty systems to name a few.

**What Makes RAN Fire Protection Engineering Unique**

The RAN atmosphere is energetic, fun, and focused. We enjoy our success and make sure that we appreciate the journey along the way. We are looking for an engineer with the passion about fire protection, while maintaining a workplace sense of humor. RAN is not the typical engineering firm in that we look at the business from a holistic point of view. We not only provide our engineers with opportunities to grow their knowledge of fire protection, but we also help our engineers understand the business side of the firm—in turn demonstrating how every day actions affect the overall health of the business.
