

## **SFPE Seeks Student Intern**

SFPE is looking for a student intern who can start work immediately.

Specifically, we need help with revisions to the SFPE Standard S.01 (Fire Exposure Standard). The committee has put together a database with information from about 500 fire tests and we need help reviewing this database and converting it to a format that the committee use to evaluate the data.

We are also working with the engineers at NIST to update the appendices for the next edition of the SFPE Handbook. This work involves fact checking the data in the appendices.

We are estimating this work to take about 150 hours and could evolve into an internship through the summer and fall (with new projects). We offer \$20/hour and remote work is allowed.

If interested, please send your cover letter and resume to Chris Jelenewicz, SFPE Technical Director, at [cjelenewicz@sfpe.org](mailto:cjelenewicz@sfpe.org). We would like to have this position filled by the end of March.
