

## Fire Protection Consultant

We are looking for an experienced and motivated individual with expertise in fire protection engineering / fire and life safety consulting with the ability to grow its present practice. The team member will be responsible for managing engineering projects, completing assigned tasks and providing solutions to fire protection related challenges. Tasks may include:

- Perform analysis of drawings and codes to determine compliance of building, fire alarm and fire protection system designs and provide suggested solutions.
- Manage project schedules, budgets and client deliverables.
- Perform building surveys to evaluate condition and code compliance of fire alarm, fire protection systems, egress, fire resistance rated enclosures, etc.
- Coordinate and witness testing of fire alarm and fire protection systems.
- Prepare construction documents and specifications for fire alarm and fire protection designs.
- Prepare technical reports / analyses using excellent written and oral communication skills.
- Participate and represent the company professionally with Building and Fire Department representatives.

## Qualifications

- Minimum of three (3) years experience in fire protection engineering / consulting.
- Strong written and oral communication skills.
- Proficient with AutoCAD. Experience with BIM/REVIT is preferred, but not required.
- Professional Engineering license is not required.
- Proficient with Microsoft product suite (Office, Excel, Word and PowerPoint).
- Experience in developing new business or an interest in learning.
- Experience in reviewing, interpreting and implementing requirements of building codes and standards.

Travel to sites and client meetings are required based on the needs of the project. Project locations may include existing buildings or buildings under construction. Some travel may be required outside of the tri-state area, but will be limited.

Sparc offers a flexible, family-friendly work schedule with a competitive benefits package. We are looking for a person with a desire to be part of a high-performance team who will be a strong contributing team player.
