**Duties**
Summary

As a Fire Protection Engineer, you will be responsible for all aspects of fire protection engineering, fire safety, and fire prevention for GSA-controlled spaces, including buildings and spaces.

Location of position: Public Buildings Service, Facilities Management Division. Lakewood, CO.

This position reports to PBS, Region 8.

We are currently filling one vacancy, but additional vacancies may be filled as needed.

Responsibilities

Serve as a technical authority to provide their advisory, consultation, and professional judgement with respect to their assigned workload regarding fire protection concerns particularly on technically complex fire protection engineering related matters to appropriate individuals and regional management.

Responsible for all fire protection matters on assigned complex projects and for assuring that all matters conform to fire protection requirements in GSA policy, regulations, and codes and standards.

Ensure that assigned projects are technically correct for both design and construction and are consistent with the appropriate current practices in the industry; that they are within the technical and administrative constraints of the project and that they are fully coordinated and compatible with other engineering disciplines of the project.

Manage fire protection engineering portions of complex new construction or complex renovation projects and incorporates fire protection design practices into all phases of design and construction.

Resolve any issues that cannot be resolved by other regional engineers or consultants. Where deficiencies are noted, this individual also directs necessary changes and furnishes assistance required.

Perform internal fire protection and life safety review of proposed offered space (GSA Form 12000, a valid building certificate of occupancy, scaled floor plans, and maintenance records).

Investigate fire incidents with a level of effort in relationship to the severity of the fire incident. Work cooperatively with Federal and state investigators as a team to determine the cause and origin of fires in GSA-controlled space.
Evaluate Regional fire incident data on an annual basis, including unwanted fire alarms, to determine any similarities and trends.

Provide training to GSA Facility Managers, GSA leasing specialists, GSA project managers, GSA personnel, Federal agencies, etc., on various fire protection program activities.

Develop and/or review scopes of work for fire protection engineering service contracts.

Assist Contracting Officers with contract administration activities for fire protection engineering service contracts.
