Want to be part of something big? As an intern at the National Fire Protection Association Headquarters, you will get full exposure working for the Fire Protection Research Foundation (FPRF). FPRF is the research affiliate for the National Fire Protection Association (NFPA), a worldwide leader in fire, electrical, building, and life safety. You will actively participate in exciting projects throughout the organization. You get to see firsthand how we have a key role in keeping first responders safe, helping to provide architects with guidelines for building design and safety, providing education to children in schools and so much more. Interns at NFPA work alongside some of the brightest minds in the engineering and research industries. You will discover and apply these learnings to your work in the classroom and your future career!

A Little Bit About You:

- You are currently a senior or graduate level engineering student.
- Research and data fascinate you. You find analysis interesting and dig the details.
- You are comfortable expressing your ideas and information, both written and verbally.
- You are positively curious about the world of engineering and eager to take in as much information and knowledge as possible to apply to your future.
- You are a team player and are engaging and encouraging in group work, while you can hold your own when working solo.
- You have a positive attitude and ready to jump in and help with a diverse, multitude of assignments.

The Nitty Gritty – aka, the pretty awesome stuff you’ll be doing:

- Assist the Fire Protection Research Foundation team with several interesting projects involving fire safety research and data synthesis and analysis.
- Opportunities abound to build your portfolio through co-authorship on internal and external publications
- Assist and support FPRF with key program activities, most notably, research that supports NFPA fire safety codes and standards.

Interested? Get in touch with Us!

- Part-time remote position; June 2022 through August 2022
- Email your resume and cover letter to Lauren Hultin, HR Generalist, at lhultin@nfpa.org

We are looking forward to hearing from you!
