When you walk into a building do you immediately start analyzing it? Do you wonder about the life safety, fire alarm and automatic suppression systems? Well, so do we. We are looking for some passionate interns who are curious about building systems to join our team!

The bulk of our projects are renovations, frequently of only the MEP and FPE systems, so it makes for some interesting and challenging projects. The fun of renovation work is dealing with the existing constraints imposed by the structure or building operations. We find ourselves regularly solving problems like how to make the equipment fit into an existing building or figuring out how the contractor will build your design. Clients choose us when they want the job done right the first time. We’re such great problem solvers that 95% of our clients would refer us to others.

With offices located in the Mid-Atlantic region and our interesting client list, combined with our renovation specialty, you will get to go into some interesting buildings - sometimes seeing history from the inside out. Check out our website for some examples of our work.

WHAT SUMMER CONSULTANTS CAN DO FOR YOU

• Give real world FPE industry experience
• Provide hands-on experience with tools such as Revit and AutoCAD
• Provide you with different projects – we have never had identical projects and we rarely have “typical” projects. Buildings are unique and so are their systems
• Help you get your boots dirty learning from senior engineers in the field

WHAT YOU CAN DO FOR SUMMER

• Dive into designing quality projects from day one. Not just drafting them, but surveying existing conditions, calculating system sizes, laying out ductwork, lighting, or sprinkler heads, and lots more fun stuff
• Help us tackle our clients’ problems

WHAT YOU SHOULD BRING WITH YOU

• Excellent written and verbal English communication skills
• Strong skills in Microsoft Word and Excel
• AutoCAD and Revit experience a plus
• 2 years completed toward a bachelor’s degree in engineering with a preference for those intending to pursue fire protection engineering
