Hybrid/Remote

“We take our jobs seriously, but not ourselves”

TO APPLY

Please email your resume to Doug Fisher at contact.us@feifire.com

Fisher Engineering, a Bowman company specializes in fire protection engineering design and consulting. Like most people in the fire protection engineering industry, we got into the field because we wanted to make a difference. With their passion for engineering, our senior staff guide our young talent to grow and develop into knowledgeable, high-performing engineers. Even though our work is serious, we have fun while doing it. We are looking for highly motivated people who have interest in a variety of projects in a fast-paced environment.

WHAT WE DO: We provide building and fire code consulting, fire protection system design and commissioning, and third party fire protection engineering design review including sprinkler, fire alarm, fire pump and special suppression systems. Additional services include forensic fire protection engineering analysis and expert testimony.

WHERE WE DO IT: We work globally, but most of our work is in North America. We work in aircraft hangars, fuel tank farms, manufacturing facilities, chemical process facilities, laboratories, hotels, rocket integration/launch facilities, warehouse/storage, detention/correctional, as well as office and residential facilities.

WHAT WE’RE LOOKING FOR

Come grow with us! We’re looking for Fire Protection Engineers for our Atlanta (GA), Phoenix (AZ) and Virginia Beach (VA) offices as well as hybrid or remote arrangements. As a fire protection engineer with FEI, you will perform:

• Project and client management
• Fire protection and life safety system design
• Commissioning of fire protection and life safety systems
• Facility fire protection, code and life safety analysis
• Hydraulic modeling, including hydrant and fire pump testing
• Forensic engineering
• Energy storage/li-ion battery system analysis

QUALIFICATIONS

• Interest in getting your hands dirty and feet wet in the field
  We don’t just sit behind our desks buried in code
• Bachelors or Masters degree in Fire Protection Engineering
• Five to ten years work experience in fire protection engineering
• Professional engineer license in Fire Protection Engineering (preferred)
• Project management/client management experience
• Revit and/or AutoCAD experience
• U.S. Citizen required

Fisher Engineering, a Bowman company offers an excellent compensation package including profit sharing, employee stock purchase plan, 401k retirement plan (with company match), health/dental insurance and flexible work hours.

FEI is an equal opportunity employer.
