Koffel Associates & Koffel Compliance

Expertly Engineering Safety from Fire®. We are recognized experts and have a passion for fire protection codes and standards. We specialize in fire protection engineering design and consulting.

- Woman owned, small business located in Columbia, MD
- Providing design and consulting services for existing, new, expansion, and renovation projects in the public and private sectors

**Job Description:**

Work within a team led by a Professional Engineer to conduct plan reviews, fire alarm and sprinkler design projects, healthcare life safety assessments, and code consulting. Never get bored at a desk with a flexible combination of in-office work, fieldwork (including domestic travel), and remote work. The following skills are helpful and will continually be developed through job training:

- Fire protection and life safety code analysis
- Ability to read and interpret drawings
- Perform field surveys including Life Safety surveys and construction administration services
- Apply requirements of fire alarm and sprinkler systems

**Qualifications:**

- Bachelor of Science degree in Fire Protection Engineering
- Ability to travel domestically
- Experience working in AutoCAD and/or REVIT (preferred)
- Good written and verbal communication skills

**Why work with Koffel:**

Join our team to be a part of a group that loves what they do and collaborates to make the fire protection engineering field better. Enjoy a company culture focused on work/life balance plus an excellent compensation package including performance-based bonuses, 401k retirement plan (with guaranteed company contribution), individual health insurance paid by the company, company cell phone option, and flexible work / PTO hours. Koffel supports employees towards earning their Professional Engineering license.

Koffel is an equal opportunity employer.
