Job Description

At Boeing, we innovate and collaborate to make the world a better place. From the seabed to outer space, you can contribute to work that matters with a company where diversity, equity and inclusion are shared values. We're committed to fostering an environment for every teammate that's welcoming, respectful and inclusive, with great opportunity for professional growth. Find your future with us.

The Boeing Company is currently seeking an **Associate Fire Protection Engineer** to join the team in either **Seattle, WA** or **North Charleston, SC**.

This position is looking those with a passion for Fire Protection Engineering. This opportunity provides a unique work environment to engineer and design protection for our aerospace products. The selected candidate will work independently as well as a phenomenal team within their own work schedule. Come join us within the Enterprise Fire Protection team today!

Position Responsibilities:

- Ensures compliance with applicable fire and building codes and standards (e.g., federal, state, local) by assisting in the development of fire protection specifications and procedures
- Assists in reviewing and approving designs (e.g., construction, fire protection systems, production and manufacturing processes), performing general fire protection analyses (e.g., hydraulic calculations, code research, interpretation), and participating in negotiations with local building and fire agencies and conducting fire system tests/evaluations (e.g., acceptance, periodic) in order to minimize the impact of potential losses, maintain compliance with requirements and protect people, property and the environment
- Ensures compliance with company policies and procedures by participating in design reviews and approvals (e.g., construction, fire protection systems, production, manufacturing processes), assisting in the performance of general fire protection analyses and assisting in fire inspections and systems tests to minimize the impact of potential fire losses and maintain compliance with requirements and protect people, property and the environment
- Assists in the revision of company standards, processes and procedures by teaming with internal customers (e.g., Workplaces Services, business units, EHS) to comply with applicable codes and standards and to enhance the fire safety for the company
