Technician – Fire Testing

Capital Testing and Certification Services is seeking a lab technician who is well organized and energetic, has excellent time management skills, and works well in a small group setting.

Primary Job Responsibilities:

- Conduct laboratory testing with direction and oversight of laboratory managers in the large-scale fire lab
- Provide administrative assistance in processing exemption applications for state and federal formaldehyde emissions regulations
- Coordinate with supervisors and engineers to maintain and improve test equipment and calibrations
- Review and follow laboratory standard operating procedures and test methods
- Demonstrate competency in the technical and related work of Capital Testing
- Expand laboratory capabilities through investigation of additional test methods of interest
- Coordinate with technical staff in analysis of data and detailed report generation
- Provide technical expertise and guidance on accreditation of new and existing test methods
- Develop and improve operating procedures for new and existing services
- Follow best laboratory practices to promote a safe and functional working environment
- Safe handling of hazardous materials

Minimum Qualification:

- Bachelor of Science degree or other technical degree with preference of interest in building materials, engineering, physical science, material science, or related field
- Attention to detail and basic mechanical aptitude
- Technical competency to understand and communicate test procedures and results
- Ability to follow rigorous standard operating procedures
- Possess good computer, verbal, and written communication skills
- Ability to routinely lift 25 pounds

Preferred Qualification:

- Familiarity with reading and interpreting code (IBC, FAA, DOT, FRA) and regulatory (CARB, EPA) language
- Knowledgeable in the field of fire science
- Proficiency with power tools
- Proficiency with Microsoft Office suite

Competitive salary and bonus program, health insurance, and retirement benefits provided to the right candidate commensurate with education and experience.

Salary Range: \$50,000 - \$60,000

Resume and cover letter may be sent to experts@capitaltesting.org
