## Entry Level Fire Protection Engineer- Winter 2025 in Atlanta, Georgia

At Jacobs, we're not just building structures, we're helping our clients innovate and grow by designing, engineering, and executing the construction of their state-of-the-art facilities that are changing our world. We're transforming intangible ideas into innovative solutions designing the future - today.

You'll impact the world around you by helping us solve real-life challenges. YOU are the future of our company. We'll rely on you to provide support to our teams on critical projects while fostering a culture of continuous learning and inclusion as you bring fresh ideas to the table. You'll work alongside professional engineers and designers, gaining exposure to project coordination, relevant computer-assisted engineering software, data collection and so much more.

As an Entry Fire Protection Engineer working with our Built Environments team, you'll use your skills and experience to help deliver and complete challenging and engaging buildings projects. You'll assist in the design of sprinkler systems, special hazards suppression systems, fire pumps, fire alarm systems, and building/life safety codes under the guidance of a knowledgeable team of experienced Fire Protection Engineers.

You'll be a part of diverse multi-discipline teams allowing you to both share what you know and learn so you can grow. Bring your creativity, ambitious spirit, extreme attention to detail, and a willing-to-learn attitude, and we'll help you pursue and fulfill what drives you - so we can deliver extraordinary solutions for a better tomorrow, together.

This role is for a opening in Knoxville, Greenville, Atlanta or Orlando.

- Bachelor's Degree in Fire Protection Engineering, Mechanical Engineering or similar field from an ABET or ETAC accredited program
- Working knowledge of Microsoft Office programs
- United States Citizenship

Ideally, you'll also have:

- 3.0 GPA
- Must be at least a rising Junior
- Fire alarm, fire sprinkler, and/or life safety design experience
- Prior work or internship experience
- Familiarity with NFPA and ICC codes and standards
- University level experience with CFD (Computational Fluid Dynamics) (FDS) modeling and analysis
- Willingness to travel to jobs sites around the world
- Fundamentals of Engineering (FE) certificate
