

## Fire Protection Engineer - Discipline Leader - Remote with Travel - Federal Sector

Procon Consulting, a fast-growing professional services firm in McLean, VA with expertise in construction management (CM), construction-related technology, space planning, and facilities management, seeks licensed Fire Protection Engineer with 10+ years' experience to build a team and grow our Fire Protection Division. Candidate must (i) have a BS degree in Fire Protection Engineering (or similar engineering program), (ii) hold a fire protection PE in the US, and (iii) hold NICET or NFPA certification. This is a long-term role on federal projects. The ideal candidate would be able to obtain a federal clearance (HSPD-12 minimum) and at least 10 years of experience in a Fire Protection Engineering role or similar position. This role requires various skills and experience as listed below. This candidate must be within close proximity to an airport or major metropolitan area.

Procon will set the bar for expectations of what Fire Protection Engineering can be – from design through warranty, new construction, and renovation – and you can be part of that. Salary commensurate with experience, skills, and education. Travel required (25%).

### **Qualifications and Skills**

- Ability to work and travel throughout the continental US.
- 10 years of experience in fire protection and life safety systems is required.
- NICET experience is required.
- Experience with national fire protection codes.
- Four-year engineering degree from an ABET accredited institution.
- Applicants must have the desire and ability to learn about life safety and fire protection systems, maximizing performance, and must be up to the challenge of leading a team of owners, designers, and contractors to find and fix issues from the beginning of design through construction.
- Applicants must have the desire to lead, teach and help grow the fire protection team.
- PE License is required (any of the 50 states)
- Willing and ability to travel up to 25%.

### **Responsibilities and Duties**

- Perform technical reviews of building and development plans and specifications for compliance with Life Safety Code and adopted National Fire Protection Association systems/standards.
- Check sprinkler plans and hydraulic calculations.
- Ensure compliance with gaseous fire suppression systems, fire alarm systems, smoke control and related requirements.
- Conduct construction and highly technical fire and life safety-related field inspections.
- Maintain records and files; prepare reports.

- Respond to inquiries from the public regarding fire prevention practices.
- Oversee/lead the work of other fire protection staff in the absence of the Fire Marshall.
- Lead programs centered around fire protection and life safety systems.

\$140,000 - \$180,000 a year

Travel expenses will be paid. Salary is based upon experience.

Benefits

Interested and qualified candidates please submit a cover letter and a resume.

Procon offers competitive salaries and a comprehensive benefits package, including full medical/dental insurance and 401(K) plan. Procon is an equal opportunity employer and considers qualified applicants for employment without regard to race, gender, age, color, religion, disability, veteran status, sexual orientation, or any other protected factor.
