Job Description:

KForce is seeking a Fire Protection Engineer to support the 11th Civil Engineering Squadron (11 CES) at Joint Base Anacostia-Bolling (JBAB), Washington DC. Work is on-site, Monday-Friday.

Duties include:

- Review and certification of document requirements on projects as needed
- Develop fire protection plans, solutions and designs for facility and infrastructure projects

Required skills/education:

- Three years of experience in developing plans, solutions and designs for facility and infrastructure projects and systems.
- Bachelor's degree in fire projection or fire safety or a comparable engineering degree (mechanical engineering) with fire protection experience/training.
- Demonstrable understanding of applicable fire health and safety standards
