DETAILS

Where you fit in at Campbell Code Consulting

You will be the primary point of contact for clients on numerous projects and will be responsible for understanding client expectations and meeting them. You will have a team of engineers and consultants who can support you with drawing reviews, code research, and other technical tasks. At times, you may need to perform technical work yourself, but the ideal situation is for junior staff on the team to perform the technical work while you provide oversight.

You will be responsible for the overall quality and accuracy of the work sent to the client, whether performed by you or by other engineers working on your projects.

You will have the assistance of our operations team for scheduling, document handling, invoicing, and other administrative tasks.

What You'll Be Doing

- Serving as the project manager and primary point of contact for numerous fire protection design projects
- Attending meetings with clients to answer technical questions and provide consulting advice
- Providing written email responses to client questions
- Designing fire protection systems in Autodesk Revit
- Preparing fire protection specification sections
- Attending occasional site visits before and during construction
- Cultivating long-term client relationships that lead to repeat work for the firm
- Preparing proposals for new work opportunities
- Overseeing the overall progress of your projects to meet client expectations and our firm financial goals

What you need to know (or learn)

- 10+ years of experience providing building fire protection engineer design services
- Strong knowledge of NFPA 13, 72 and the related requirements found in the IBC and NFPA 101
- Experience with projects using UFC 3-600-01 and PBS P-100 preferred
- Strong Revit Design skills, including the ability to setup projects and produce floor plans, riser diagrams, details and schedules
- Ability to sell work and bring in new opportunities and projects to the firm
- Excellent writing skills
- Excellent verbal communication
- Self-starter, ability to take initiative, be innovative, and function as an effective team player
- Strong interpersonal skills with a positive mindset, customer-centric focus, and professional manner
- Ability to manage projects effectively to deliver on time and on budget
- Ability to manage deadlines and multiple projects efficiently and effectively with strong attention to detail
- Ability to adapt and thrive in a dynamic environment

What Kind Of Qualifications Do You Need?

- PE in Fire Protection Engineering with ability to obtain multi-state licensure
- Bachelor's Degree in Fire Protection Engineering or related field
- Strong industry network with ability to win work for the firm

We look forward to reviewing your application and hopefully welcoming you to the Campbell Code Consulting Team!

If this sounds like your kind of position, then lets take the next step! Visit our website at www.campbellcodeconsulting.com/hiring or send us an email to apply.
