# DETAILS

## Where you fit in at Campbell Code Consulting

You will be the primary point of contact for clients on numerous projects and will be responsible for understanding client expectations and meeting them. You will have a team of engineers and consultants to support you with drawing reviews, code research, and other technical tasks. At times, you may need to perform technical work yourself, but the ideal situation is for junior staff on the team to perform the technical work while you provide oversight.

You will be responsible for the overall quality and accuracy of the work sent to the client, whether performed by you or by other engineers working on your projects.

You will have the assistance of our operations team for scheduling, document handling, invoicing, and other administrative tasks.

## What You'll Be Doing

- Serving as the project manager and primary point of contact for numerous code consulting projects
- Attending meetings with clients to answer code questions and provide consulting advice
- Providing written email responses to client code questions
- After the engineering team reviews architectural plans for compliance with the fire protection and life safety requirements of the IBC/NFPA 101, perform QA/QC checking to ensure we are providing a consistently high-level of service across the firm
- If needed, performing plan reviews yourself
- Preparing code modification requests as needed to facilitate permit approvals
- Cultivating long-term client relationships that lead to repeat work for the firm
- Preparing proposals for new work opportunities
- Overseeing the overall progress of your projects to meet client expectations and our firm financial goals

## What you need to know (or learn)

- 10+ years of experience providing building code consulting services
- Strong knowledge of the IBC and NFPA 101, specifically the fire protection and life safety requirements in these codes
- Ability to sell work and bring in new opportunities and projects to the firm
- Excellent writing skills
- Excellent verbal communication
- Self-starter, ability to take initiative, be innovative, and function as an effective team player
- Strong interpersonal skills with a positive mindset, customer-centric focus, and professional manner
- Ability to manage projects effectively to deliver on time and on budget
- Ability to manage deadlines and multiple projects efficiently and effectively with strong attention to detail
- Ability to adapt and thrive in a dynamic environment
- (Preferred): Experience in Contam/Ventus, FDS/Pyrosim, and Pathfinder

## What Kind Of Qualifications Do You Need?

- (Preferred): Bachelor's Degree in Fire Protection Engineering or related field
- (Preferred): PE in Fire Protection Engineering
- Strong industry network with ability to win work for the firm

***We look forward to reviewing your application and hopefully welcoming you to the Campbell Code Consulting Team!***
