

Merrick is seeking an experienced mid-level Fire Protection Engineer with **three to six (3-6) years** of experience to join our rapidly growing High Performance Facilities team. With a focus on DoD federal government, Military, and Intelligence Community Facilities this person can be in any of our Merrick offices, or hybrid. A hybrid (work from home and office) schedule is encouraged.

Typical annual pay range for this position is \$88,600-\$108,000. Pay offered may vary depending on job related knowledge, skills, and experience.

WHAT YOU'LL DO

Working tandemly with other Mid-Level and Senior Fire Protection Engineers, the candidate can look forward to the following responsibilities:

- Deliver Fire Protection Engineering subject matter expertise to our unique DoD federal government, Military, and Intelligence Community partners to include:
 - Military Flight Simulators and Training Buildings
 - Intelligence Community Data Centers and Support Buildings
 - Satellite Reconnaissance Launch and Support Buildings
 - Secure (SCIF) Compartmented Buildings and Facilities
- Independently create and evaluate design analyses, conceptual designs, program requirements, calculations, equipment selection and layout, and system selection and layout for the following:
 - Fire Suppression Systems (wet-pipe, dry-pipe, pre-action systems)
 - Fire Alarm and Mass Notification Systems
 - Clean Agent Systems
 - Smoke Management Systems
 - Life Safety Code and Building Code Analysis
- Collaborate in a design team environment, working together with engineers, designers, and project managers
- Take ownership of small projects or portions of larger projects
- Moderate level interface with mission partners, clients, and Authorities Having Jurisdiction (AHJ) to prepare, validate, and deliver key design efforts
- Grow and expand your career by receiving mentorship from a variety of Mid-Level and Senior Professionals

REQUIRED QUALIFICATIONS

- Bachelor's or Master's degree in Fire Protection Engineering (ABET accredited)
- Engineer-in-training (EIT) or NICET Level 3 and above; PE License preferred
- Willingness to learn; ability to work semi-independently as well as on teams; self-motivated

- Minimum three (3) years of experience in Fire Protection Engineering (internship experience counts)
- **Client projects for this position require US Citizenship**

DESIRED QUALIFICATIONS

- Experience in Fire Protection Engineering for DoD federal government, Intelligence Community and Military projects
- Moderate-to-advanced knowledge of Unified Facilities Criteria (UFC), International Building Codes, Life Safety Codes, and NFPA Codes and Standards
- Have the willingness and ability to obtain and maintain Top Secret Clearance
- Proficiency with MS Office, Revit, AutoCAD, Bluebeam
- Ability to obtain PE within 1 to 2 years is a plus
- Domestic and international travel opportunities available
