Job Description

Who We Are

At WSP, we are driven by inspiring future-ready pioneers to innovate. We're looking to grow our teams with people who are ready to collaborate in building communities and expanding our skylines. To do this, we hire candidates of all experiences, skillsets, backgrounds and walks of life. We actively foster a work environment and culture where inclusion and diversity is part of our fundamental structure. This is delivered behaviorally, through our policies, trainings, local partnerships with professional diverse organizations, internal networks and most importantly with the support and sponsorship of our leaders who help drive our commitment to an inclusive, diverse, welcoming and equitable work environment. Anything is within our reach and yours as a WSP employee. Come join us and help shape the future!

This Opportunity

WSP is currently initiating a search for a Full-Time **Fire Protection Consultant** for our **Arlington, VA** office. This search is for a dynamic and experienced FPE and will play a crucial role within our group.

This position will be responsible for providing technical expertise, and guidance as a mentor to ensure the highest quality of fire protection and life safety solutions. The successful candidate will lead the development and execution of fire protection and life safety strategies, foster a culture of technical excellence, drive innovation, and uphold our high standard of care, particularly in the context of building and fire code consulting.

Your Impact

Technical Excellence

[Skip to main content](#) Develop the design of state-of-the-art fire protection and life safety systems.

- Provide expert technical guidance and solutions to ensure compliance with industry standards, building codes, and regulations.
- Drive continuous improvement in design methodologies and technological advancements to enhance the quality of fire protection and life safety solutions.
- Knowledgeable in the areas of building and fire codes, fire alarm and sprinkler design, and the industry standard of care.

Building Code Consulting

- Provide building code consulting efforts, providing guidance to clients and project teams to ensure compliance with local, state, and national building codes and regulations.
- Stay current with evolving building codes and contribute to the development of company-wide strategies for code compliance.
- Experience with a wide range of complex projects and occupancy types (high-rise buildings, large campus arrangements, mixed use developments, healthcare facilities, governmental facilities, etc.)

Project Excellence

- Collaborate with project managers and cross-functional teams to ensure the highest quality of fire protection and life safety solutions for a diverse portfolio of projects.
- Review and approve project designs, calculations, and documentation to ensure accuracy and adherence to standards.
- Maintain a deep understanding of industry best practices, codes, regulations, and emerging trends in fire protection and life safety engineering.
- Ensure that the fire protection and life safety practice consistently meets and exceeds the established standard of care for all projects.

Who You Are

Required Qualifications

- Bachelor or Master of Science Degree in Fire Protection Engineering.
- Professional Engineering (PE) license.
- Proven experience (3 - 5 years) in the fire protection and life safety industry.
- A deep understanding of Building and Fire Codes, Standards, and Regulations (IBC, NFPA, UFC, OBO, etc).
- Excellent communication and interpersonal skills to collaborate effectively with clients, project teams, and regulatory authorities. The ability to convey complex technical concepts to both technical and non-technical audiences.
- Must be flexible to a variety of schedules to meet business needs and able to prioritize responsibilities and quickly adapt to change in a pressure work environment.

Occasional travel may be required depending on project-specific requirements.

Preferred Qualifications:

- Knowledge of REVIT and/or AutoCAD.
- Experience in fire protection engineering design applications.
