McMillen, Inc. is looking for a **Staff Fire Protection Engineer (EIT)** to join our team. The Staff Fire Protection Engineer will work at the direction of project engineers and managers applying various design engineering techniques, modeling methods, and construction support to deliver successful fire protection & life safety projects for federal, intelligence, and defense departments, and power utility companies.

Responsibilities:

- Collects data and gathers information or documents.
- Performs standard computations or analysis.
- Performs basic design tasks.
- Prepares drawings and visual aids.
- Prepares portions of project documents.
- Edits specifications.
- Performs research and investigations.
- Observes construction activities.
- Performs basic site inspection work.

Qualifications:

- Bachelor's degree in Fire Protection Engineering, Mechanical Engineering, or related discipline
- EIT required
- 0-5 years in fire protection engineering
- Ability to work in a multi-disciplinary team environment
- Skill in reading, interpreting and communicating contract documents, plans and specifications
- Knowledge of the application of engineering and construction materials related to construction projects
- Possesses strong interpersonal and communication skills, both written and verbal
- Ability to prioritize and manage multiple tasks independently
- Must have a flexible work schedule, be willing to travel up to 20%
- Must be able to work in a team environment

Compensation Package:

- **Pay Range:** \$66,000 – \$82,000. (DOE)
- **Benefits:** McMillen provides a full Benefits Program comprising medical, dental, vision, life, disability, FSA, EAP, 401(k) and match, 9 paid holidays, generous PTO, opportunity for stock ownership, and wellness reimbursement.

Who We Are: McMillen, Inc. designs and builds solutions that shape the future of water resources. As an employee-owned firm, we take pride in every project because we know our work truly matters. Our people thrive on solving complex challenges, pushing boundaries, and refining their craft. We don't look for the complacent or the comfortable. We seek problem solvers, innovators, and experts who are always striving to be better. We support continuous learning, cutting-edge technology, and a balanced work-life environment so our employees can build careers they're proud of.

We are focused in the dams, energy, fisheries, natural resources, and infrastructure markets. With staff across the United States, Canada, Europe, and beyond, we bring global best practices to our clients. Our people integrate engineering, environmental, and construction expertise to deliver practical, results-driven outcomes. From concept to completion, projects are guided through feasibility studies, permitting, design, construction, and commissioning, ensuring technical precision and real-world functionality.

EEO: McMillen, Inc. is an EEO/Affirmative Action Employer and will make all employment related decisions without race, color, religion, sex, national origin, disability or protected veteran status.

Visa sponsorship, including renewal during employment, will not be provided for this position.
