Engineering Technician (Co-op) Spring-Summer 2019 (Full-Time)

For more than twenty years, Combustion Science & Engineering, Inc. (CSE) has been dedicated to the study, advancement, and application of combustion and fire science. Combining a wealth of knowledge and experience, from the private to public sector, from academia to industry, CSE's spirited partnership and dedicated team offers exceptional technical leadership, intelligent solutions in combustion and fire protection, and superior fire and explosion investigations.

We are looking for a co-op/intern for the Spring 2019 through Summer 2019. Student is required to take Spring Semester off from school.

The co-op student will be responsible for supporting fire protection and combustion projects including lab experiments and engineering analysis.
